Sample FAQ

If you have questions regarding samples for analysis or sampling procedures, please contact us. The minimum analysis charge is \$25. Discounts are available for 10 or more samples of the same test.

GRAPE AND JUICE SAMPLES

- Grape samples should be refrigerated and sent with an ice pack.
- Berry samples should contain approximately 500 berries.
- Cluster samples should contain approximately 20 clusters.
- We recommend that juice samples be sent in a plastic container 1/4 full and placed in several plastic bags. We recommend shipping these samples with an ice pack.

CELLAR SAMPLES

- Take a representative sample of the wine. If the wine is in several tanks or barrels and you expect the tank or barrel samples to differ in significant ways, sample each lot separately.

BOTTLED WINES

- An unopened bottle is required for post-bottling analysis.

PREPARING AND SENDING SAMPLES

- You can request sampling supplies from us. We are happy to provide sample tubes, labels, insulated boxes, and ice packs. We ask that new clients make a \$60 Supply Deposit that is credited back to you over your next three (3) services.
- In order to ensure the most accurate analysis, please send full (topped) containers of wine.
- Plastic (non-brittle) is preferable to glass, because breakage is minimized. Clean 500mL water bottles sealed with electrical tape make a good container in a pinch.
- If specific information is required on the report (vintage, variety, appellation, etc.) please make sure that this information is supplied on the Sample Label.
- Samples may be sent via UPS, Fed Ex, etc., or USPS. Label the package as "Samples for Analysis". Courier service may be requested for a fee. We recommend Fed Ex because they often have quicker delivery times (see Shipping Comparison below) and arrive earlier in the day.

Shipping an 8"x8"x8", 2 lb. package of 10 sample tubes for delivery the Next Day from Dallas.

Carrier	California		Texas Wine Lab		% Savings
UPS	Next Day Air Saver	\$58.03	Next Day Air	\$38.56	33.55%
Fed Ex	Standard Overnight	\$58.03	Ground	<u>\$9.81</u>	83.09%
