Since 1938 – Still The First Soil Lab In Texas – Serving the World From The Rio Grande Valley.

...Presents Three
Easy-Return Mail-In Soil Test Kits
for Lawns & Gardens and for Small Farms
- and -
Two Mail-In Soil Test Kits
for Landscape & Nursery Professionals.

Easy-Return Kits are designed to be convenient to use and to eliminate most of the tedious parts of getting soil tested – such as having to:

- ◆ Find a bag to put the right amount of soil in.
- ◆ Find a return box to ship the sample and the lab form back to the lab – and have to come up with packing.
- ◆ Download the sample form - or order the sample form and the sample bag.
- ◆ Address the return box.
- ◆ Tape up or glue the return box.

The sample bag and form, and pre-addressed return box are **all included** – as well as a convenient method of record-keeping for all tests.

These – plus easy-to-understand soil sampling instructions - and a lot of other useful information are all a part of an attractive hanging display!

Easy-Return Kits Available –

Lawn & Garden Basic – Essentially, a special accurate N-P-K-Ca Basic Fertilizer Guide – with added features - for periodic maintenance of nominally healthy soils.

Lawn & Garden Comprehensive with Micronutrients – a version of our exhaustive CO₂ Extraction Method commercial growers' test – for the initial test and for long-term usage, or for problem areas.

Agricultural Comprehensive with Micronutrients - same as above, but designed for acreage or small farms, requiring one or few composite samples. Worded to reflect agricultural terminology.

Landscape & Nursery Kits Available –

Do **NOT** include sample return boxes, or any informative literature, as they are intended for bulk sample return at least cost to the professional.

Landscape & Nursery Basic - same as Lawn & Garden Basic, but with terminology adjusted for the professional.

Landscape & Nursery Comprehensive with Micronutrients – same as Lawn & Garden Comprehensive with Micronutrients, but with terminology adjusted for the professional.

All Tests are individually assayed. **Recommendations** for all of these tests are carefully and individually considered, and are customized for the client to show what really matters by providing an appropriately-worded clear plan to follow for best results. *All kits are serially-numbered* for accurate tracking and the packaging has provisions for the clients' own record-keeping.
